

ONLINE SALES PERFORMANCE ANALYSIS

An exploratory analysis of sales performance product categories, regions,
and payment methods using Google Sheets.

Gizem TORUN / 09.06.2026

1.PROJECT OVERVIEW

Business Question

What factors drive revenue performance across product categories, regions, and payment methods?

Dataset

Source: Kaggle

Records: 240 transactions

Categories: 6 product categories

Regions: North America, Europe, Asia

Data Preparation

Data Cleaning Steps

- Verified data types
- Converted numeric fields from text to numeric format
- Created a data dictionary
- Validated revenue calculations

KPI Dashboard

KPI	VALUE
Total Revenue	\$80,567.85
Total Units Sold	518
Number of Orders	240
Avg Revenue per Order	\$335.70

2.KEY VISUALIZATIONS

Revenue Distribution by Product Category

Revenue Performance by Region

Revenue Share by Payment Method

3.SUPPORTING ANALYSIS

Region & Category

4.KEY INSIGHTS

Insight 1

Electronics generated the highest revenue, accounting for approximately 43% of total sales revenue.

Insight 2

Clothing recorded the highest sales volume but did not generate the highest revenue, indicating lower average product prices.

Insight 3

North America contributed nearly 46% of total revenue and was the strongest performing market.

Insight 4

Credit card transactions generated approximately 63.5% of total revenue, making it the dominant payment method.

Insight 5

Revenue concentration varied significantly by region and product category.

5. BUSINESS RECOMMENDATIONS

Recommendation 1

Prioritize Electronics products in marketing campaigns and inventory planning.

Recommendation 2

Explore opportunities to increase average order value within the Clothing category.

Recommendation 3

Leverage successful North American product strategies in other regions where applicable.

Recommendation 4

Continue optimizing the credit card payment experience, as it represents the dominant payment channel.

6. CONCLUSION

This analysis identified Electronics as the primary revenue driver, while North America emerged as the most valuable market. The findings highlight that revenue performance is influenced not only by sales volume but also by product pricing and regional demand patterns. These insights can support future marketing, inventory, and regional growth strategies.
